

Natural & Alternative Treatments

The Leading Complementary and Alternative Medicine Database

This comprehensive natural medicine resource focuses on alternative and holistic approaches to healthcare and wellness. Designed for consumer health researchers and clinicians, *Natural & Alternative Treatments* is an essential tool that satisfies an ever-growing demand for accurate, unbiased information on natural health.

Evidence-Based Research Covering a Broad Range of Natural Health Topics

This resource provides an in-depth analysis of more than 200 health conditions and the natural treatments used to treat them.

Evidence-based, *Natural & Alternative Treatments* cites more than 12,000 clinical research studies across 700 articles containing information on medical conditions, alternative therapies, herbs and supplements, functional foods, drug interactions and homeopathy.

This database provides clinicians and consumer health researchers with a comprehensive and reliable source of current information on natural health and medicine.

Information provided in this database should not be viewed as a means for self-diagnosis or a substitute for professional medical advice, diagnosis or treatment.

Subjects Include:

- Acupuncture
- Chinese herbal medicine
- Western herbal medicine
- Cranial-sacral therapy
- Reflexology
- Vitamin supplements
- Herbs and supplements, such as fish oil, green tea, *L. Acidophilus* and *L. Casei*
